

This week Year 1 have been focusing on the book 'What We'll Build' by Oliver Jeffers'. We have talked about things that we can build together, such as lego construction, large junk modelling (take a look at our fabulous space rocket) and even friendships. We built a rocket together in school and stuck each child's inventions on the side of the rocket to send to the moon.

We have also had lots of wonderful learning at home – building shelters, doing fabulous maths and a super homemade bicycle.
