

We hope you enjoyed your 'Online safety for parents & carers' session & found it useful & informative.

Below are some key messages for you to give your child & some things for you to consider...

Key messages for your child about staying safe 'online'

Keep personal information private

Be nice to others when online

Always ask a 'trusted adult' first – games, sites, apps

Consider who their 'trusted adults' are that they can talk to if they are ever worried about something that happens online

Not everything they read or see online is necessarily true & so always check the source of the information

Never arrange to meet up with someone they have met online

How & where they can report abuse or inappropriate communication

It is never too late to tell

How you can keep your child safe 'online'

Continue to discuss the internet & online safety with your child

Promote yourself as someone they can talk to if they are worried about anything that happens online, & that it is never too late to tell or report'

Check privacy settings on all accounts within apps and games

Use the resources available to you to educate yourself on the 'apps' or games they are using / playing

Put passwords on any bank cards linked to devices/ accounts

Explain the difference between 'Real friends' & 'Online friends' & monitor who it is they are communicating with

Ensure they are reminded never to meet up with an 'online friend'

Set up time limits for how long your child is online

Ensure they never share their location

Where you can get more help/ support...

www.kidsonlineworld.com is a website from ECP Ltd
"The more you know, the better!"

Updates via emails and vlogs, & full of information for parents about the latest apps & games that children are using. It is designed to help you make an informed decision regarding the suitability of apps & games & how to use them in the safest way
